STATEMENT 13: HISTORICAL AUSTRALIAN GOVERNMENT DATA

This statement reports historical data for the Australian Government fiscal aggregates across the general government, public non-financial corporations and non-financial public sectors.

STATEMENT 13: HISTORICAL AUSTRALIAN GOVERNMENT DATA

Statement 13 provides historical data for the Australian Government fiscal aggregates across the general government, public non-financial corporations and non-financial public sectors.

Under the accrual Government Finance Statistics (GFS) framework, flows are recorded in the period in which they occurred. As a result, prior period outcomes may be revised where information arises that could reasonably be expected to have been known in the past, is material in at least one of the affected periods and can be reliably assigned to the relevant period(s).

Estimates up to and including 1998-99 are calculated on cash terms, while estimates from 1999-2000 onwards are derived from an accrual framework. Due to methodological and data-source changes associated with the move to an accrual accounting framework, time series data that include measures derived under both cash and accrual accounting should be used with caution.

There are other structural breaks within the data set, prior to the shift to accrual reporting. Classification differences and revisions, as well as changes to the structure of the budget, can impact on comparisons over such an extended period.

Specific factors that affect the comparability of data between years include:

- classification differences in the data relating to the period prior to 1976-77 (which means that earlier data may not be entirely consistent with data for 1976-77 onwards);
- adjustments in the coverage of agencies included in the accounts of the different sectors. These include the reclassification of Central Banking Authorities from the general government to the public financial corporations sector in 1998-99, and subsequent backcasting to account for this change;
- consistent with the revised GFS treatment announced by the Australian Bureau of Statistics (ABS) (Cat. No. 5501.0, released October 2002), the general government surplus measures in this statement, from 1998-99 onwards, incorporate the interest component of superannuation related payments by the Australian Government general government in respect of accumulated public non-financial corporations' superannuation liabilities;
- transfers of taxing powers between the Australian Government and the States;
- other changes in financial arrangements between the Australian Government and the State/local government sector; and

- changes in arrangements for transfer payments, where tax concessions or rebates are replaced by payments through the social security system. This has the effect of increasing both cash receipts and payments, as compared with earlier periods, but not changing cash balances. Changes in the opposite direction (tax expenditures replacing payments) reduce both cash payments and receipts.

While approximate adjustments can be made to identify trends in budget aggregates on a generally consistent basis, the further back the analysis is taken, the more difficult the task becomes.

Table 1: Australian Government general government sector receipts, payments and surplus[(a)]

	Receipts			Payments			Cash surplus	
	$m	Per cent real growth	Per cent of GDP	$m	Per cent real growth	Per cent of GDP	$m	Per cent of GDP

(a) There is a break in the series between 1998-99 and 1999-2000. Data for the years up to and including 1998-99 are consistent with the cash ABS GFS reporting requirements. From 1999-2000 onwards, data are derived from an accrual ABS GFS reporting framework, with receipts proxied by receipts from operating activities and sales of non-financial assets, and payments proxied by payments for operating activities, purchases of non-financial assets and net acquisition of assets under finance leases. Due to associated methodological and data-source changes, time series data that encompass measures derived under both cash and accrual accounting should be used with caution.

na Not applicable, due to a structural break in the series.

(a) There is a break in the net debt and net interest series between 1998-99 and 1999-2000 (the first year of accrual budgeting). Up to 1998-99, Australian Government general government debt instruments are valued at historic cost. From 1999-2000 onwards, Australian Government general government debt instruments are valued at market prices, consistent with accrual GFS standards.

(b) Source: ABS Cat. No. 5501.0, 5513.0, Australian Government Final Budget Outcomes and Treasury estimates.

(c) Excludes superannuation related interest flows.

Table 4: Australian Government general government sector revenue, expenses, net capital investment, fiscal balance and net worth[(a)]

(a) The fiscal balance is equal to revenue less expenses less net capital investment. Net worth is calculated as assets less liabilities.

(b) There is a break in the net worth series between 1998-99 and 1999-2000. Data up to 1998-99 are sourced from the Australian Government's Consolidated Financial Statements based on Australian accounting standards. Data beginning in 1999-2000 are based on the GFS framework. For the general government sector, the major change across the break in the series is an improvement in net worth. This is primarily due to the move from valuing investments in public corporations at historic cost to current market value (which is calculated using the share price for listed corporations). This is partly offset by defence weapons platforms no longer being recorded as assets and valuing debt at current market value.

(c) Following advice from the ABS, the net worth series has been revised back to 1999-2000 to remove dividends payable from the measurement of the general government sector's equity holding in the public financial corporations sector. From 2002-03 net worth also includes the initial recognition of a provision for asbestos related claims. At the time of the 2002-03 Final Budget Outcome a reliable actuarial measure was not available. Following an actuarial review a provision for asbestos related claims was included in the audited 2002-03 Consolidated Financial Statements.

Table 5: Australian Government general government sector accrual taxation revenue, non-taxation revenue and total revenue

(a) There is a break in the series between 1998-99 and 1999-2000. Data for the years up to and including 1998-99 are consistent with the cash ABS GFS reporting requirements. From 1999-2000 onwards, data are derived from an accrual ABS GFS reporting framework, with receipts proxied by receipts from operating activities and sales of non-financial assets, and payments proxied by payments for operating activities, purchases of non-financial assets and net acquisition of assets under finance leases. Due to associated methodological and data-source changes, time series data which encompasses measures derived under both cash and accrual accounting should be used with caution.
